# List of Hazardous Waste Code Descriptions

Please run the lookup table report for LU\_WASTE\_CODES for description of federal and state waste codes in this report,

# List of Handler Universe Abbreviations

Active	Active Status – Indicates that the facility could be subjet to the federal RCRA, Subtitle C or a state's authorized
	hazardous waste program. This definition has no legally enforceable or binding determination about the status of a
	particular site or the oblications of an owner or operator.

Commercial TSDF — Commercial TSDF — Indicates that the facility is a commercial operator of treating, storing and disposing of hazardous waste.

Et Indicator (HE/CW)

Environmental Indicator (Human Exposure/Groundwater Release) — Indicates that the facility has controls in place for Environmental Indicators. HE - Human Exposures ('+' indicates the exposure exists and is under control; '-' indicates the exposure does not exist). GW - Groundwater Release ('+' indicates the exposure exists and is under control; '-' indicates the exposure exists and is

not under controt; 'N' indicates the exposure does not exist).

Federal Generator Federal Generator Status – Indicates the regulatory status of the site as determined by the quantity and/or toxicity of hazardous wastes generated, stored or accumulated over a specified period of time.

HSM - Indicates that the facility manages hazardous secondary material(s) (e.g. spent material, by-product or

sludge) that when discarded, would be identified as hazardous waste.

IC in Place Institutional Controls in Place -- Indicates that the facility has institutional Controls in place ("Y" indicates that the

facility is in the universe).

Importer Importer – Indicates that the facility imports hazardous waste into the United States from a foreign country.

Mixed Waste Generator Mixed Waste Generator - Indicates that the facility is a generator or TSDF that handles waste mixed with nuclear

source, special nuclear or by-product material.

Operating TSDF — Operating TSDF — Indicates that the facility is a Treatment, Storage or Disposal facility subject to any type of

enforcement. It then specifies the type of facility (L - Land Disposal; I - Incinerator; B - BIF; \$ - Storage; T -

Treatment).

Short Term Generator — Short Term Generator -- Indicates that the facility is a sndrt term or one time event generator and not generating

from ongoing processes.

State Generator State Generator Status -- Indicates the regulatory status of the site in view of implementing the State's "broador in

scope" or "more stringent than" rules. Although an implementing State might use terms that differ for their

generators these terms would be translated to match the Federal regulatory term.

Transporter -- Indicates that the facility is engaged in the off-site transportation of hazardous waste. ("Y" indicates

that the facility is in this universe).

Subpart K/College Subpart K/College or University -- Indicates facility has opted into the subpart k laboratory rule as a college or

university.

Subpart K/Hospital Subpart K/Teaching Hospital – Indicates facility has opted into the subpart k laboratory rule as a teaching hospital.

Subpart K/Non-profit Subpart K/Non-profit Research Institute – Indicates facility has opted into the subpart k laboratory rule as a non-

authors in the specific transfer of the state of the specific and the subject it sold and yet as a side

profit research institute.

Subpart K/Withdrawal Subpart K/Withdrawal from Rule - Indicates facility has withdrawn from the subpart k laboratory rule.

#### User Selection Criteria

Handler EPA ID: NJP000965681

History: All records

BR Cycles: Show all

Include Notes: No

#### Results

Data meeting the criteria you selected follows.

Total Pages: 3

### Report Description

The RCRA Site Detail report provides "all available details" from the handler module and summarized information from the waste activity monitoring module for one RCRA site. The report integrates National Biennial RCRA Hazardous Waste Report data with Site Identification data.

Details reported about the RCRA site include basic handler module information; the standard suite of universes; information about each source record received for the facility, including basic information, location and mailing address, source record and permit contact person (including historical records), list of NAICS codes, complete list of regulated waste activities; and summarized National Biennial RCRA Hazardous Waste Report information by reporting cycle year, including quantity totals (generated, managed, shipped, received), and top ten GM forms by quantity generated. Top ten GM form list shows reported waste description, quantities, onsite and offsite system types, and EPA and State waste codes.

Information listed for the RCRA site can be limited by latest historical information and most recent BR cycle.

Data is sorted by the most recent Received Date. If more than one record has the same Received Date, the data is sorted by Source Type (I-Implementer; N-Notification, B-Biennial Report with Subsequent Notification, R-Biennial Report, A-Part A, T-Temporary, E-Emergency).
